Providing Wireless Internet Service to Stewart, B.C.

Onewayout.net Society is a small group of volunteers who have been providing internet service to the residents of Stewart since 1995.

We started with modem, dial-up, service and have now grown to enhanced WiFi with 9 Access Points strategically located throughout the community.

Our recent expansion(2009/2010) now provides 2 parallel systems:

- 1. 2.4 Ghz (WiFi) with 7 Access Points (Debbie, Irene, Harbour, Sandi, Daktari, Beegee and Virginia) strategically located throughout town***
- 2. 900 mhz with 2 Access Points (north and south ends of town for broad community service)***

Costs are very moderate:

\$30.00 per month per IP address

We can also provide enhanced service to your home internet service with Tranzeo home transceiver units (either by direct purchase or monthly rental)

**Please contact us for additional information at
